## SUMMARY

Computer Science Engineering student with a **CGPA of 8.88/10** who builds full-stack web applications, backend APIs, and Linux-based systems. Comfortable working with TypeScript, Python, Java, databases, authentication, Docker, networking, and REST APIs. Interested in software engineering and backend-focused development.

## EDUCATION

### Excel Engineering College

*Bachelor of Engineering in Computer Science and Engineering – CGPA: 8.88/10*

Expected May 2029

### Xavier International Secondary School

*Higher Secondary Education (+2 Science) – GPA: 3.27/4.00*

Graduated: 2022

## TECHNICAL EXPERIENCE

### System Administration & Virtualization Lab

*Independent Technical Project*

Mar 2024 – Present

Chennai, India

- Use Debian Linux for system configuration, package management, troubleshooting, and Bash-based automation.
- Maintain a KVM/QEMU lab with Debian, Kali Linux, and Windows 11 for isolated networking and security experiments using Nmap, Wireshark, and SMB enumeration.

## PROJECTS

### TeLSA Official Website

*Next.js, React, TypeScript, PostgreSQL, Prisma, Auth.js*

- Built and deployed a full-stack website for the Terai Law Students Association with membership, events, publications, gallery, and contact workflows.
- Implemented an authenticated admin dashboard for content and media management using PostgreSQL, Prisma, Auth.js, and Cloudinary.

### ATTENDANCE OS

*Next.js, TypeScript, Recharts, Framer Motion*

- Built an attendance prediction dashboard that calculates remaining classes from actual calendar dates and verified class timetables instead of fixed weekday assumptions.
- Added OD/Medical Leave simulation and attendance visualizations to help students evaluate future attendance before missing classes.

### ShopEase eCommerce Platform

*React, TypeScript, Node.js, Express, MongoDB*

- Built product, order, and admin workflows for a full-stack eCommerce application with Razorpay payment integration.
- Added Zod request validation and containerized the application with Docker, using Nginx as a reverse proxy.

### Library Management System

*Java, Spring Boot, MySQL, Docker*

- Developed REST APIs and role-based access control for users, books, and borrowing workflows using Spring Boot.
- Designed the MySQL database and containerized the application and database with Docker Compose.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, TypeScript

**Frameworks:** React, Next.js, Node.js, Express.js, Spring Boot

**Databases:** PostgreSQL, MySQL, MongoDB, Prisma, Mongoose

**DevOps & Tools:** Git, GitHub, Docker, Docker Compose, Nginx, Postman

**Systems & Networking:** Linux (Debian/Kali), KVM/QEMU, Bash, Nmap, Wireshark, Scapy, REST APIs, JWT, RBAC

## COMMUNICATION

English, Hindi, Nepali, Bhojpuri, Maithili
